SUMMARY

Accomplished Application Developer who excels at collaborating with internal clients to develop solutions designed to solve business problems, automate manual processes, and integrate systems into the business. Skilled at coding, troubleshooting, and debugging solutions. Adept at documenting technical activities that arise while participating in continuous improvement initiatives. Dedicated to increasing customer satisfaction, improving business processes, developing unique applications for clients, and improving functionality.

EDUCATION

BS in Computer Science,

Illinois State University, Normal, IL (2017)

WORK EXPERIENCE

Spraying Systems | Glendale Heights, IL

2019 – Present

Application Developer

Coding and maintaining business applications, troubleshooting and solving software issues and bugs, and participating in an agile development environment including daily scrum, sprint planning, retrospectives, and performing peer code reviews.

- Designed and implemented a .NET MVC application for processing new leads into the CRM system.
- Assisted in a ReactJS application that displays information within CRM.
- Created new assets, handled metadata for each asset, and detected duplicates in DAM by developing a DAM frontend and backend application to manage operations.
- Devised a web resource application in CRM enabling the use of autocomplete on fields in the CRM system.

K-Rise Systems | Aurora, IL

2018 – 2019

Application Developer

Utilized HTML and CSS to develop and integrate web pages for client web applications. Developed SQL queries for data analysis and extraction integration into the current ERP system. Identified and patched bugs for client web applications. Implemented features for a .NET development platform application.

- Improved search performance by six seconds and provided users with suggestions and spellchecking via Apache Solr.
- Integrated a quote feature for clients allowing quote requests and creation and checkout.

Innov8tek | Chicago, IL

2017 – 2018

Web Development Intern

Created unique and eye-catching websites using HTML, CSS, JavaScript, and PHP. Raised clients' online presence and maintained their existing website.

- Revitalized a website for johnbielskilaw.com – a law firm.

Illinois State University | Normal, IL

2016 – 2017

Research Assistant – Social Media Data Collection Program

Utilized Twitter API and Google Maps API in Java. Analyzed text via Natural Language Processing techniques.

- Identified statuses based on the provided criteria by building Python scripts.

Teaching Assistant – Data Structures in C++

2016 – 2017

Developed sample programs demonstrating good practice and well-structured code. Identified errors and flaws in student logic by assisting them with debugging their code.
